🏛 Issuer & Protocol Due Diligence

Evaluates the company / protocol behind each RWA — issuer score, red flags & default history, jurisdiction, regulator, AUM, and a 12-month issuer score trend. Auto-syncs with the detected primary issuer.

ISSUER DUE DILIGENCE · Refresh

475
D
High Risk
Issuer details received

Issuer: **Tether**

RED FLAGS & TRACK RECORD

Red flags detected	4
Historical defaults	0
Performance trend	**Volatile but profitable**
AUM (RWA programme)	**$150.0B**

CORPORATE PROFILE

Incorporation	**British Virgin Islands**
Regulator	**El Salvador · None major**
Founded	**2014**

Largest stablecoin by supply but persistent transparency concerns: no full audit, reserve composition opaque, multi-jurisdiction structure, historical enforcement under exposure, active lawsuits ongoing.

ISSUER SCORE TREND (12 MONTHS)

Due diligence scoring monitor regulatory issues and uncertainty and flags < 50 which are informational defaults (-10 each). The 12-month trend is reconstructed from public quarterly disclosures, on-chain TVL movement, and regulatory updates. Tiers: 750+ Low Risk · 600+ Moderate Risk · 350+ Elevated Risk · <350 High Risk. Not investment advice. Full methodology in methodology.

⚖ Legal & Regulatory Compliance

MTL/BML, arbitration, MICA/EEC analysis, and transfer restrictions for the detected RWA issuer — compliance grade, jurisdiction risk map, regulatory pillars, mainnet heatmap, and 6-month compliance trend.

COMPLIANCE GRADE · Refresh

Custodian type	Mixed bank custody (limited disclosure)
Reserve ratio	102%
Attestations	82%

CUSTODIAN RELIABILITY METRICS

Attestation coverage	55/100
Custodian reliability	55/100
Transparency	55/100
Cold storage / segregation	55/100
Attestation cadence	55/100
Reserve transparency	55/100

RELIABILITY METRICS BREAKDOWN

POR ATTESTATION HISTORY (LAST 7)

ORACLE STACK

Resolution	Internal feeds · limited third party PoR
KNV SOURCE	Quarterly SEC reserve report · no on-chain NAV
CROSS-CHAIN	Native bridges (varies per chain)

CUSTODY DOSSIER

POR PROVIDER	SEC quarterly reserve report
ATTESTATION CADENCE	Quarterly attestation (no full audit)
RESERVE BACKING	USTs, secured loans, BTC, gold, other investments
CUSTODY TYPE	Mixed bank custody (limited disclosure)

Sources: SEC quarterly reserve report · Tether transparency page

Custody assessments are based on public attestations, custodian SEC reports, and issuer disclosures as of the latest review. Not investment advice. Full methodology in methodology.

🔮 Oracle & Data Integrity

Pricing oracles, NAV feeds, and redemption reliability — critical for illiquid RWA. Oracle risk scores, latency, redemption-rate badge, oracle-stack details, 7-day failure patterns, and NAV freshness.

ORACLE & DATA INTEGRITY · Refresh

332
D
High Risk
Oracle profile resolved

Issuer: **Tether**

LATEST & REDEMPTION RISK

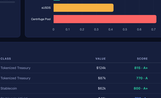
Oracle latency (median)	1800 sec · Slow
Redemption risk	Medium
NAV accuracy (30-day)	97.5%
Oracle incidents (7-day)	28

ORACLE STACK

Resolution	Internal feeds · limited third party PoR
KNV SOURCE	Quarterly SEC reserve report · no on-chain NAV
CROSS-CHAIN	Native bridges (varies per chain)

ORACLE FAILURE PATTERNS (LAST 7 DAYS)

NAV FRESHNESS (HOURS SINCE UPDATE)



Oracle assessments combine provider track record, feeder update latency, NAV deviation vs. reference, and recent stale-feed / deviation incidents. Live RWA feeds: Chainlink, RedStone and cross-chain attestation (CCIP, LayerZero) are weighted higher than manual-only NAV publication. Not investment advice. Full methodology in methodology.

💧 Liquidity & Redemption Risk

Redemption-channel depth, redemption queues, fee schedules, and on-chain liquidity ratios for the deployed RWA issuer — liquidity score, primary redemption channel, redemption queue, fee schedule, and 7-month redemption flow.

LIQUIDITY & REDEMPTION · Refresh

675
B
Moderate Risk
Liquidity profile resolved

Issuer: **Tether**

FEE SCHEDULE & DEPTH

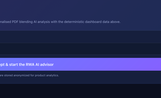
Fee-rate risk	Medium
Redemption-queue risk (30d)	243.0M
On-chain liquidity (TV.org)	74% of TVL
Latest avg redemption	1.5 days

REDEMPTION PROFILE

PRIMARY TIMELINE	T+1 to T+5 (ATC required)
PRIMARY REPORT	Tether (issuer) · every 1/12/2014 (deepest stablecoin market)
FEE SCALE CLASS	Medium

ON-CHAIN LIQUIDITY (% OF TVL · LAST 7 DAYS)

REDEMPTION FLOW (AVG DAYS TO REDEEM · 7 MONTHS)



Liquidity assessment combines primary redemption pathways, pathway reliability, trading 30-day secondary market depth, on-chain redeemable share of TVL, and a 5-to-value stress test under a special-market premium. 1-0.(1-%) (1-0) day notice timelines apply across redemption, fee acceleration prices. Full methodology in methodology.

📈 Yield & Risk-Adjusted Performance

Risk-adjusted yield scoring, Sharpe ratio, drawdown, volatility, and stablecoin depeg events, and stress-test scenarios for the detected RWA issuer — yield score, 12-month Sharpe, 5-month yield-to-correlation history, and 5 scenarios stress test.

YIELD & RISK-ADJUSTED · Refresh

644
B+
Elevated Risk
Yield profile resolved

Annual yield: **n/a (non-yield-bearing)**

RISK-ADJUSTED METRICS

Sharpe ratio (TVL)	0.00
Projected max drawdown	-8.0%
BTC correlation (90d)	0.20 · Decoupled
Net APY	n/a (non-yield-bearing)

STRESS-TEST SCENARIOS

YIELD VS. CRYPTO CORRELATION (6 MONTH HISTORY)

Risk-adjusted scoring rewards Sharpe ratio (≥3), Calmar and penalizes 50% half drawdown (-5 to) and BTC correlation above 0.5 (-50), with an additional -20 above 0.75. Stress scenarios show projected drawdown under Mild / Moderate / Severe / Extreme conditions plus a Recovery shock. Non-yield-bearing assets (RWA, USDT, USDC) are scored on capital preservation rather than APY. Not investment advice. Full methodology in methodology.

📊 Portfolio RWA Exposure Aggregator

Multi-protocol RWA exposure, issuer concentration, asset-class breakdown, diversification map, asset-class & issuer breakdown, Herfindahl concentration index, and cross-asset BTC correlation matrix. When a wallet is connected, holdings load from the live on-chain scan.
